

Value Added Services to help you make the most of every minute

Bank of Telecom® is a secure, automated international online trading market with same day settlements and delivers a unique blend of telco and fintech to help you get the most out of your international voice business.

With over 100's routes from 1100+ carrier Members across 130 countries, we carry millions of retail and wholesale voice minutes every month. Members benefit from \$20 same-day settlement fee via Bank of Telecom's FX partners Western Union and AMEX, as well as a host of other benefits to ensure your business runs as cost-effectively as possible, so it's no surprise that we see an average of 30 new Members joining every month.

Maximise your Revenues with Bank of Telecom VASs

Here is a snapshot of what Value Added Services are available to Bank of Telecom members to help maximise your revenues:

Increase quality and sales with FREE traffic cleansing

- Improve the stats on your route by using traffic cleansing to prevent bad calls affecting your route performance, which will help increase your quality and sales.
- Members can run traffic cleansing to one destination, per month for free.
- Non-members can do the same at a cost of \$10 per channel.

Access CLI & NCLI test reports

- Run free destination test reports showing FAS, PDD and CLI results.
- Run up to 10 every month for free with additional reports charged at US\$5.
- The same applies for NCLI too including an audio recording of each call.
- Non-members can run a CLI or NCLI test report for a charge of US\$5.

Make informed decisions with voice market reports

- Check the global voice market price for each of your preferred destinations.
- Select a market destination report for any CLI or NCLI destination, showing the price in \$US for the last six months, obtained from the global market.
- Non-members can do the same at a cost of \$5.

Access HLR for voice

- Access the Home Location Register for voice.
- Run one destination report up to 10,000 number per month, for free.
- Additional look ups are charged at US\$0.02c each.

Raise your ASR% and build your traffic with transcoding

- Bank of Telecom provides transcoding to all its members, which allows for the termination of all calls from different CODECs to a single CODEC. For example, incoming calls from a G711, G723, and G729 call stream can all be terminated to a G729 route when using transcoding.
- Significantly raises the ASR% for the route and helps you build traffic.

Access FREE voice quality reports

- If you are wanting to know what kind of ACD and ASR should you expect for a destination, why not check how the route performed in the market?
- Select a voice quality report for any CLI or NCLI destination, that will show the ACD and ASR statistics obtained from the global market.
- Non-members can do the same at a cost of \$5.

Contact our global, multi-lingual team today

It only takes 24 hours to verify new registrations for the Bank of Telecom where you can trade in English, French, Spanish, Russian or Chinese at the Bank of Telecom.

Bank of Telecom is a great place to trade global minutes, increase operational efficiencies, reduce overheads such as billings and collections, while saving on international settlements and freeing up your cash.
